

President of the International Olympic Committee Juan Antonio Samaranch, left, signs the book about the IOC he gave to Jerald Jordan during his visit to Gallaudet. Looking on is Jorge Soler, professor of philosophy.

ICD will help train Peace Corps volunteers to work in Philippines

Gallaudet's International Center on Deafness has received a second grant from ACTION/Peace Corps to recruit and train Peace Corps volunteers to work in the area of deafness in the Philippines.

The new \$59,703 award, which will be used in part to train volunteers for a month this summer on campus, was a result of the success of the previous training project held during the summer of 1980. At that time, 15 persons—including four from Gallaudet—participated in the program. Those volunteers will be finishing their two-

year Peace Corps service in the Philippines next fall, about the same time that the new volunteers arrive.

Project Director Eli Savanick of the International Center on Deafness said that the last training program was considered by the Peace Corps to be highly successful. Training people to work in the field of deafness in the Philippines is now the first priority of the Philippine Peace Corps, the largest of the Peace Corps projects, said Savanick.

This time, the ICD will be training from 8-12 people. Peggy Parsons will

Olympic Committee pres. visits Gallaudet Jan. 29

by Pattie Cinelli

An interest in sports was the common bond that culminated in the historic meeting of two presidents at Gallaudet on Jan. 28.

Juan Antonio Samaranch, the president of the International Olympic Committee (IOC), learned about Gallaudet and deafness and received a brief tour of the campus when he visited Jerald Jordan, president of the International Committee of Sports for the Deaf (CISS, from the French name of the group.) He also met with President Merrill.

Samaranch stopped off in Washington to visit President Ronald Reagan on his way to Los Angeles for meetings of the various Olympic international sports federations. He first met Jordan, director of Admissions and Records, this past summer in Cologne, West Germany at the opening ceremonies of the World Games for the Deaf. Jordan acted as host to Samaranch at the World Games. "This was the first time a representative from IOC came to our Games, and it was an honor for us to have the president of that organization at the ceremonies," said Jordan. It was there that Samaranch, who was not familiar with Gallaudet, promised Jordan to visit the College during his next trip to the United States.

During an informal chat in Jordan's office, Samaranch presented him with a hard-bound book on the history of the International Olympic Committee presidents and a silver tray with the International Olympic symbol inscribed on it. Samaranch was elected president of

the IOC at the conclusion of the Moscow Olympics in 1980. He was previously the Spanish ambassador to Moscow.

The two discussed the results of the World Games in Cologne, the Winter World Games for the Deaf in Italy next year and the upcoming Olympics and World Games for the Deaf in Los Angeles in 1984 and 85 respectively. Samaranch said to a Washington Post reporter that he thinks the Olympic movement has recovered from the American-led boycott of the 1980 games in Moscow and thinks that the 1984 Olympics will be "one of the biggest and most successful."

Samaranch told Jordan that in the IOC he has many friends who are always ready to help him. Samaranch also said he'd like to contribute on behalf of the IOC some prize—perhaps a trophy or plaque—in recognition of the sports organizations at the College. "I want to demonstrate that the IOC is interested in sports for the deaf. The Olympic movement wants to do whatever is necessary for the deaf," he said.

Samaranch had a chance to speak his native language while at Gallaudet. Jorge Soler, a Gallaudet philosophy professor, was invited to join the tour. Both he and Samaranch are from the same area in Spain. Soler answered questions Samaranch had about the two Spanish students studying at Gallaudet and also shared with the president the history of deaf people in Spain. When he heard that the education of the deaf began in Spain in 1545

continued on page 2

Education majors teach in public schools

During the week of Jan. 11, the first nine undergraduate education majors began their eight-week full-time field work as student-teachers in public school classrooms in the District of Columbia and Montgomery County, MD.

The student-teaching experience, which is all day, every day, involves Gallaudet seniors in teaching both small and large groups and requires them to take full responsibility for the entire classroom for a several-day period.

All student-teaching classrooms have only hearing children because the experience leads to certification in "regular" education, as a foundation for later graduate study in educating the hearing impaired. As a result, several students are using the services of professional interpreters throughout the school day; daily on-site supervision of Gallaudet students is provided by the

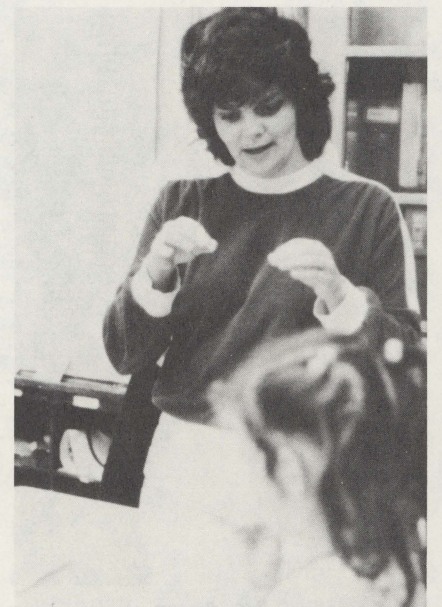

children's regular classroom teacher. In addition, Dr. David Martin and Dr. John Madison of the Department of Education faculty observe and critique the Gallaudet students' work in the classroom on a regular basis.

The members of the first-time-ever group from Gallaudet and their fields of teaching are: Sue Gill (physical education), Valerie Dively (English), Patti Coco (math), Staci Miller (social studies), Jennifer Nicol (elementary), Nancy Forman (elementary), Susan Sparks (elementary), Debbie Rodgers (elementary) and Audrey Wood (elementary). Practicum sites are the Langdon Elementary School in the District of Columbia, the Travilah Elementary School in Gaithersburg and the Julius West Middle School in Rockville.

Martin, who is coordinator of the program, pointed out that this ex-

perience is historic because it is a supervised full-time practicum experience in hearing classrooms for Gallaudet undergraduates, and should, as a result, provide more options for later graduate study and employment in the field of deaf education.

He added that the District of Columbia Public Schools' Certification Office will be sending a special State Approval Visiting Team to the College during the week of Feb. 8 to review the entire education major program. If the application by the School of Education and Human Services for state approval of the program receives favorable review by this team, graduates of the program will be able to receive state certification in "regular" education not only in the District of Columbia, but also in a number of other states with which the District has an inter-state agreement.

Gallaudet senior Audrey Wood works as a student-teacher with second-grade children in a science lesson in a D.C. school.

Serendipity

Library Bits & Pieces

Curriculum Lab opens

by Ken Kurlychek

The Gallaudet College Library, Kendall LRC and MSSD LRC are proud to announce the opening of the Campus Curriculum Laboratory on Feb. 15. To mark this occasion, an open house will be held from 1-4 p.m. at the Lab, located in the Kendall LRC, room 3304. All interested persons are invited to come and examine the materials and ask questions. Refreshments will be served.

The Curriculum Laboratory is the product of a cooperative effort by the three libraries and will be available for all campus personnel. Materials such as curriculum guides, sample textbooks, workbooks, course descriptions, lesson guides and unit plans were collected from state schools for the deaf, state and city school systems and other educational organizations. These materials should prove useful to students, teachers and professionals alike. Rules for borrowing and hours of operation are in accordance with the established policies of the Kendall LRC. This information may be obtained at the open house or at any of the three campus libraries.

Perhaps the most unique feature of the Lab is that information on its holding is accessible through the College Library's SIRE/G computerized information retrieval system which can be obtained either via terminals or through printouts located at various points around campus. For specific information and details contact: Carol Harter, KDES/LRC, x5190 TDD Ken Kurlychek, MSSD/LRC, x5850 voice or x5798 TDD Jane Rutherford, Gallaudet Library, x5573 voice or x5566 TDD

CASE awards

Each year the Council for the Advancement and Support of Education (CASE) sponsors an awards program for institutions who are CASE members.

If you have a publication or program you would like to have considered for submission, contact Laura-Jean Gilbert, x5858, or John Scott, x5811, as soon as possible.

Learning Center update

by Judy Cox

The Learning Center celebrated its official first birthday on Jan. 5, but it's still growing and changing.

A number of new additions have been made in the Learning Center in the past few months.

Patio furniture will make your relaxation on the upper level outside deck more pleasant in warmer weather.

A free telephone for campus calls is located next to the newly installed pay phone on the middle west area.

A new electric golf cart will help the Library transport video and audio-visual equipment where you want it set up.

A Minolta microfilm reader-printer can help you make paper copies of microfilm more easily.

A new Savin coin-operated photocopy machine is located on the lower level in the Individualized Learning area.

The Learning Center has four new Kodak carousel slide projectors.

Colorful rolling kick-step stools will help short people reach books on the top shelves of the stacks.

Professionally manufactured signs have been installed to help you find what areas you want and the information you need.

IOC president

continued from page 1

by a Benedictine monk who taught deaf people how to speak, Samaranch remarked, "It's all new to me."

Samaranch told Dr. Merrill that he was very impressed with the university. "The sports facilities are fantastic." They discussed foreign students at Gallaudet, rubella students, Northwest Campus and employment for Gallaudet students after graduation. Jordan took him on a walking tour which included the new field house, some classes in HMB, the Learning Center and Hughes Gym.

After his meetings in Los Angeles Samaranch said he plans to fly to Calgary, Canada to begin organizing for the 1988 winter Olympic Games scheduled to be held there.

Senator Bob Packwood, second from right, accepts a copy of Deaf Heritage from author and Alumni/Public Relations Director Jack Gannon at a breakfast in Packwood's honor at the home of President and Mrs. Merrill. Looking on is Cheryl Fleck of Eugene, OR, a Gallaudet junior. Senator Packwood introduced legislation in the Senate which enabled Gallaudet to acquire the Marjorie Webster property for its Northwest Campus. Also honored at the breakfast were Rep. David Bonior, a Gallaudet Trustee who also worked hard to see the legislation passed, as well as Cindy Douglass of the Senate Commerce Committee, Carrye Brown of the House Committee on Science and Technology and Martha Miller of Rep. Bonior's staff. Rep. Don Fuqua, who shepherded the bill through the House, was unable to attend the breakfast. Students from Florida will visit him in his office to present a copy of Deaf Heritage and thank him for his efforts on behalf of Gallaudet.

Peace Corps

continued from page 1

be recruiting the volunteers for the project. She will be looking particularly for deaf people who have a bachelor's degree, although hearing people who are fluent in sign language can also apply.

Lou Brown, assistant director of ICD, will be conducting the month-long training in educational methodology, which will be held at Gallaudet beginning the last week in June. Savanick noted that the ICD is looking forward to cooperative effort with other parts of the campus community in helping with the training.

After the month-long training and orientation at Gallaudet, the volunteers will go to the Philippines for further training. They will receive instruction in strategies for teaching sign language,

sign language linguistics and practical aspects for education of deaf children, as well as learning Philippine sign language and spoken languages.

Savanick and Dennis Cokely, a research associate with the Linguistics Research Lab, will leave for the Philippines on July 11 for six weeks to serve as resource persons for this training.

All the volunteers in this program will be working in deafness-related assignments, primarily in an educational setting but also with the deaf community and the community at large.

ACTION is the federal agency that administers the Peace Corps, a voluntary service organization which trains and sends American volunteers abroad to work with people in developing countries.

ICD's proposal to ACTION to conduct the recruitment and training was prepared with the assistance of Glenn Pfau and the Office of Sponsored Research.

Sponsored R&D

Grant/contract deadlines

Provided below are application deadlines of selected federal programs that offer potential grant or contract opportunities for Kendall Green faculty, staff and graduate students. More details on programs of interest can be obtained from the Office of Sponsored Research, x5030 (voice or TDD).

Deadline	Program
02/15/82	NEH—Humanities Research Conferences
02/18/82	ED—Research Library Resources Program
03/01/82	NINCDS—Communicative Disorders Branch Research
03/01/82	NICHD—Human Learning/Behavior Branch Research for Mothers and Children
03/01/82	NEH—Higher Education Humanities Consultant Grants

03/01/82	NIMH—Mental Health Research Program
03/17/82	SEP (formerly OSE)—Student Research

NIHR

Each year the National Institute of Handicapped Research (NIHR) publishes its proposed funding priorities for the research activities to receive its support. Published priorities refer to the specific activities that the Institute desires to fund in the remainder of the fiscal year.

Proposed priorities for FY 1982 appeared in the Jan. 21, 1982 issue of the Federal Register. Interested persons are invited to submit comments or suggestions regarding the proposed priorities by Feb. 2, 1982. All written comments and suggestions should be sent to Betty Jo Berland, National Institute of Handicapped Research, Department of Education, Room 3511, Switzer Office Building, Washington, D.C. 20202.

Dr. Lottie Riekehof, director of Sign Communication at Gallaudet, talks with staff from the Alabama Institute for the Deaf and Blind, where she recently conducted an in-service training program for staff and faculty. Houseparents and staff members from the Helen Keller School in Alabama were also present at the program.

Mima Bravo Fund helps Costa Ricans

Deaf/blind children in Costa Rica, who now receive virtually no education, will soon be able to get a new start in life, thanks in part to the generosity of the British Embassy Wives Association.

This Washington-based group recently donated \$2,100 to the Mima Bravo Memorial Fund, which provides Graduate School scholarships at Gallaudet for persons from Costa Rica, Central America, Latin America or around the world.

The British Embassy Wives Association raised the money through a Christmas Bazaar held last November at the British Embassy. The Association has also invited Eli Savanick, director of the International Center on Deafness, to make a presentation to them next September to further acquaint them with the work of the ICD.

The money from the British wives will help support the graduate study of Ana Torres Colombari, a teacher at the University of Costa Rica in San Jose who received the Mima Bravo scholarship this year.

Torres came to Gallaudet last fall to study education for the multiply-handicapped hearing impaired in Graduate School's Department of Education. When she completes her degree, she hopes by August of 1983, and returns to Costa Rica, she will be the first teacher in Costa Rica trained to work with multiply-handicapped hearing impaired children.

Torres paints a grim picture of educational opportunities now available for deaf/blind children in Costa Rica: basically, there are none. Deaf/blind children are placed in classes with either deaf or blind students; in either case, their needs are not met. Torres hopes to change all this by starting a program for deaf/blind children when she returns to Costa Rica. It won't be easy, she said, because Costa Rica provides little financial support for special programs. "I don't know how, but I will try to find a way," she said. If the Ministry of Education is not willing to support a new program, then Torres plans to contact private organizations to try to raise the money.

Torres credits Mima Bravo, a Costa Rican teacher of the deaf who came to Gallaudet in 1975 to study for her master's degree in Counseling, with sparking her interest in working with deaf people. She first met Mima—"a great teacher"—in 1977 while studying counseling at the University of Costa Rica. At the time, Mima Bravo was not only teaching at the University but was working on a project to establish Costa Rican sign language. Prior to this time, Torres explained, there were some standardized signs in Costa Rica but many were regional. Torres helped Mima Bravo and others develop a sign language in Costa Rica that combines ASL, Spanish and Gestuno.

Mima Bravo also set up one of the first classes in total communication in the country. In Costa Rica, Torres explained, all schools are government-controlled and the Ministry of Education has a strong oral point of view. Separate schools for deaf students use the oral method, but the total communication classes, established in March of 1978, were held in regular public schools. Originally there were

two classes, both for 10-year-olds with social and emotional problems who were "failures of the oral program." When Mima Bravo had an accident that April and died in May, 1978, Torres took over her class and continued teaching it for two years. During that time, more total communication classes were established throughout the country and they began accepting younger children.

After that, Torres began teaching sign language and practicum to University of Costa Rica students who were interested in working with deaf children after they graduated. It was during her students' visits to classes around the country that Torres met deaf/blind children "with no future at all" and decided to pursue training to work with them.

In addition to her graduate work at Gallaudet and caring for her six-month-old son, Torres now does practicum work at the Maryland School for the Blind in Baltimore. She is also working with Pre-College to help translate curriculum at Kendall School into Spanish.

A curriculum for deaf Costa Rican students is greatly needed, Torres said. In oral classes for deaf students, the curriculum consists primarily of teaching students a limited list of vocabulary words. In total communication classes, teachers were instructed to translate the oral curriculum into signs. No curriculum is available for math, science or any academic subjects. Torres has already finished translating Kendall's social studies curriculum into Spanish and is working on other areas. The curriculum will be modified for total communication classes throughout the country.

Torres spoke positively of deaf Costa Ricans' interest in Gallaudet: "They really feel this is a piece of their world. And Mima was the first to open the door, to offer them something new and different."

With Torres carrying on the work that Mima began, and extending it into the world of deaf/blind children, another door may soon be opened.

Ana Torres

Kendall students hold balloons up to the saxophone of "Officer Friendly," D.C. police officer William Hickman, to feel the vibrations from the music. Hickman, along with other officers in the Metropolitan Police Band, came to Kendall to perform for students Jan. 29. Through the "Officer Friendly" program, police come to area schools to educate children about safety and the police.

Fruit sale cancelled

Because cold weather has damaged Florida's fruit crops, The Alexandria/Potomac Lions Club citrus fruit sale has been cancelled.

GCAA meeting

The D.C. Chapter of the Gallaudet College Alumni Association will have its next regular meeting this Wednesday, Feb. 10 at 8 p.m. in the Ely Center multi-purpose room.

All chapter members and alumni who would like to become members are encouraged to attend the meeting. Since the meeting will be held close to Valentine's Day, appropriate refreshments will be served afterwards.

Volunteers to aid Information and Visitors Centers

by Kay Fitzgerald

They came from all areas of the city and surrounding suburbs, and from as far away as Manila. Sixteen volunteers with backgrounds ranging from a retired Yale PhD, to the mother of five children, to an athletic coach, to several Gallaudet students, convened at the Ely Center on Saturday, Jan. 30 for a Volunteer Orientation Program. These individuals have committed themselves to do volunteer work at the National Information Center on Deafness and the Visitors Center, both parts of Gallaudet's Alumni and Public Relations Office.

The Volunteer Orientation Program, designed and coordinated by Arlynn Snukals, acting director of the National Information Center on Deafness, and John Krpan, coordinator of the Visitors Center, gave participants an intensive one-day overview of deafness and the programs and services offered at Gallaudet.

The program included several presentations. Jack Gannon, director of Alumni and Public Relations, outlined the history of Gallaudet and the role of his office within the College community. Gannon also offered personal obser-

vations and insights on the deaf experience. Merv and Carol Garretson presented statistics and current research on the causes of deafness. They shared anecdotes and lively experiences derived from their joint affiliation with Gallaudet, the National Association of the Deaf and the World Federation of the Deaf. Merv Garretson is special assistant to the president here and Carol Garretson is assistant professor of communication arts. John Krpan, coordinator of the Visitors Center, traced the history of sign language and provided the audience with a new awareness of the art of communication.

During the afternoon, participants went to the Information Center and Visitors Center for a more detailed overview of specific assignments. At the closing session, each volunteer was presented with a Volunteer Orientation Certificate.

The Information Center provides free up-to-date information on all aspects of deafness to the general public. Volunteers will assist in the research and development of new materials and in responding to individual requests for information. The Visitors Center coordinates the visits of thousands of prospective students, professionals, parents

and special interest groups who come to Gallaudet each year. Volunteers will assist in the preparation of appropriate information packets, hosting tours and other special projects and related duties.

Arlynn Snukals and John Krpan coordinated the recent Volunteer Orientation Program.

Published each Monday for staff and faculty of Gallaudet College by the Office of Alumni and Public Relations.

Gallaudet College is an equal opportunity employer-education institution. Programs and services offered by Gallaudet College received substantial financial support from the Department of Education.

MSSD wins wrestling tourney

The Model Secondary School for the Deaf hosted the 1982 ESDAA Wrestling Tournament Jan. 29 and 30 and, as expected, Model emerged as champions for the second consecutive year.

Marty Willigan's matmen took seven first place and two second place finishes. Todd Silvestri, who won the 170 pound weight class, received the tourney's Outstanding Wrestler Award.

MSSD captured the tournament with 188-1/2 points followed by Pennsylvania School for the Deaf with 122 points and Maryland School for the Deaf with 110-1/2 points. Other schools who participated in the tournament were NYSD (4th), ASD (5th), NJSD (6th) and Lexington (7th).

A near capacity crowd attended the matches on Friday and Saturday at the MSSD gym and Willigan said his wrestlers received a lot of support from the MSSD students. "The fans were really great and my men gave it all they had in this tourney," commented Willigan.

Other MSSD winners in their respective weight classes were: D. Arnold (108 lb.), L. Albritton (122 lb.), R. Haywood (129 lb.), J. Barron (135 lb.), L. Visco (148 lb.) and O. Hill (188 lb.).

The MSSD matmen have several more matches before the St. Albans Tournament on Feb. 19 and 20 in D.C. This tourney will have about 30 high schools from around the area competing for the laurels and the Eagles are going to give it all they've got in this one, too.

Sociology careers conference set

The District of Columbia Sociological Society will sponsor its 15th Annual Undergraduate Careers Conference on Tuesday, Feb. 16. The conference will be hosted this year by the Sociology Department at George Mason University in Fairfax, VA.

The general goal of the Careers Conference is to help sociology majors recognize both the job-related skills they have acquired and the occupational fields in which those skills might be relevant. Presentations will be made by about 25 speakers knowledgeable in fields such as student personnel services, health care support services, consumer protection agencies, social science research, conflict resolution, sales and marketing, and corrections.

For further information, contact Dr. John Christiansen in the Department of Sociology and Social Work, x5342.

ASCD conference

All members of the Gallaudet community who are planning to attend the Annual Conference of the Association of Supervision and Curriculum Development (ASCD) in Anaheim in March, 1982 are asked to contact one of the members of the Gallaudet ASCD Liaison Team: Nancy Fones (MSSD), Elaine Costello (Gallaudet Press) or David Martin (Department of Education).

The Liaison Team is interested in coordinating and reporting on contributions made by Gallaudet representatives to the national conference, as well as ensuring that Gallaudet has an identifiable "presence" at the meeting.

Nancy Fones may be contacted at x5801, Elaine Costello at x5595 and David Martin at x5400, voice or TDD.

Marty Martinez, assistant editor of World Around You, helps Kendall student Benjamin Moore display his winning picture of "The Princess." The six-year-old's drawing won a special editor's award in World Around You's recent Creative Contest.

Author to speak at writers meeting

Students, faculty and staff at Gallaudet will have the opportunity to meet and exchange ideas with author Beryl Lief Benderly at a special lecture sponsored by the Gallaudet Writers Society Feb. 15. The lecture will be held at 7 p.m. in the Ely Center art exhibit room.

Best known for her book, *Dancing Without Music: Deafness in America*, Benderly is a Washington-based freelance writer who has authored several works on deafness. Her most recent writing project is a series of booklets on hearing loss that will be offered to the viewing public of the upcoming PBS television series, "The Hurt That Does Not Show." Her first

piece on deafness, and her introduction to Gallaudet, was the article, "The Gift," which appeared in the October, 1978 issue of *Washingtonian* magazine.

Over the past four years, Benderly has supported a number of campus activities. She has served as a judge of the MacDougall Creative Writing Awards as well as presenting a workshop for students on writing articles. For a more detailed picture of Benderly's background and ideas, members of the Gallaudet community might look at an interview with her published in the fall, 1981 issue of *Teaching English to the Deaf*, available in the Gallaudet College Library and the English Department office.

MSSD training course has speaker

Frances R. Link, an internationally recognized expert in the field of cognitive education and vice president of Curriculum Development Associates, was the guest speaker Jan. 22 at a special training course for a group of MSSD teachers in the teaching of thinking skills.

The course is an essential part of a special two-year pilot project at MSSD involving the curriculum program, Instrumental Enrichment. This is a supplemental curriculum focusing of specific thinking and problem-solving skills such as analysis, comparison, systematic search, classification and other essential elements of the cognitive process. MSSD teachers Cindy Rohr and Jay Innes are working directly with

the pilot group of MSSD students and expect to have videotapes later this year demonstrating the results of this curriculum with their students.

Mrs. Link conducted a workshop session emphasizing the ways in which concepts are developed, with particular attention to the skills of comparison, following instructions and analytic perception. The training group, consisting of 10 MSSD teachers and several other persons from the MSSD and Gallaudet communities, is involved in a year-long graduate-level course.

Persons interested in further information about the project may contact MSSD Principal Mary Hockersmith or David Martin in the Department of Education.

Campus Police Officer Judith Slisz and KDES Principal Ken Tiklin display the crime prevention coloring book. A hundred copies of the book have been provided to KDES by Sgt. Paul Reed of the NYPD and will be incorporated into the school's safety patrol program developed by Officer Slisz.

Host needed

The International Christian Youth Exchange is looking for a family to host 16-year-old Rainer Randell, a deaf student from Finland, for a year. The ICYC is particularly interested in placing Randell in a home with at least one hearing impaired member.

For further information, contact Mrs. Donald Heaton, 13508 Wagon Way, Silver Spring, MD, 20906, 460-0048.
